

# You too can visit the Logging Scars study area!

Without all of the hiking and pedalling...

I have received interest from several groups and individuals in my site selection process. The details are all in the report, but I wanted to also provide the means for everyone to check-out the sites - and the landscape around them - for themselves.

Here are the sites again, from a standard desktop satellite application. Whatever system you have, you can just plug in any of these coordinates and explore away!

Thank-you for your interest in our boreal forest.

Trevor

# **SITE 010** (50.6183, -91.5265)

# **SITE 101** (50.8661, -91.0699)
